NOV 19 2012

Mr. N. Darahyl Dennis
Land and Remediation Project Manager
Georgia Power Company
241 Ralph McGill Boulevard, N.E.
Atlanta, GA 30308-3374

SUBJECT: Completion Report - Phase 2 PCB Remediation
Former Riverside Generating Plant
Savannah, Chatham County, Georgia

Dear Mr. Dennis:

The U.S. Environmental Protection Agency (EPA), Region 4 has completed a review of the December 2010, Completion Report - Phase 2 PCB Remediation submitted on your behalf by SBX Technologies, LLC (SBX). The report documents the PCB remedial activities that were conducted at Georgia Power Company's former Riverside Generating Plant in Savannah, Georgia at the intersection of Martin Luther King Jr. Boulevard and River Street. The report was reviewed for conformance with the TSCA regulations found at 40 CFR §761.61(a) for Self Implementing Cleanup of PCB Remediation Waste and EPA's approval letter dated September 14, 2007.

Georgia Power Company removed PCB contaminated soils and concrete pads from two areas identified during site characterization activities at the former Riverside Generating Plant which were documented in the *Site Characterization and Request for Approval* dated September 6, 2007 and the *Interim Completion Report, Phase 1 PCB Remediation* dated December 2007. Two phases of excavation and successive verification sampling were conducted between August 30, 2006 and August, 11 2010. In accordance with 40 CFR §761.61(a)(4)(i)(A) and Condition 2 of EPA's approval letter, the cleanup level for bulk PCB remediation waste (soil) for high occupancy areas of ≤ 1 ppm, without further conditions, was achieved, as demonstrated by verification sampling conducted in accordance with 40 CFR §761.61(a)(6) and Subpart O. Pursuant to 40 CFR §761.61(a)(6)(ii), self-implementing cleanup is complete.

Docket No. 776349

Should you have any questions concerning this approval, please contact John Allison at (404) 562-8461 or by electronic mail (e-mail) at allison.john@epa.gov. You may also contact Russ McLean, Project Manager, at (404) 562-8504 or by e-mail at mclean.russ@epa.gov for any general questions on the EPA, Region 4 PCB cleanup program.

Sincerely,

A handwritten signature in black ink, appearing to read "Karen Knight", followed by a long horizontal flourish.
